PROFESSIONAL SUMMARY

Backend engineer with 10 years of experience developing, modernizing, and operating business-critical backend systems across enterprise and high-growth technology environments. Experienced in Java, Spring Boot, AWS, Terraform, and microservices, with expertise in payment integration, hotel payment disbursement, and post-booking platforms. Proven track record of modernizing legacy applications through architectural refactoring, including monolith-to-microservice migration, while collaborating with cross-functional Agile teams to deliver scalable, reliable backend solutions and maintain high-availability production systems.

TECHNICAL SKILLS

Languages: Java, SQL, JavaScript, PHP, C#

Frameworks & Architecture: Spring, Spring Boot, REST APIs, Microservices

Cloud & Infrastructure: AWS (EC2, ECS, S3, RDS, Lambda, CloudWatch, IAM, SQS, SNS), Terraform

Databases: PostgreSQL, MongoDB, MySQL

CI/CD & Version Control: Git, GitHub Actions, Jenkins

Monitoring & Testing: Datadog, JMeter, Postman, Selenium

Collaboration: Jira, Asana, Confluence

Training: AWS Developing on AWS (2021), AWS Architecting on AWS (2022), PCI DSS Security Awareness

PROFESSIONAL EXPERIENCE

Traveloka - Backend Engineer | Oct 2016 - Apr 2025

Leading Southeast Asian travel technology company providing online travel services, including hotels, flights, and other travel products.

- Designed and delivered internal tooling and automation for failed issuance handling, rescheduling workflows, and post-booking issue resolution, significantly reducing manual effort, operational costs, and human error.
- Led the separation of post-booking functionality from the core booking platform into a dedicated service, reducing system complexity and enabling faster, independent feature delivery.
- Owned end-to-end hotel payment disbursement systems, ensuring accurate and timely payout processing for thousands of accommodation partners.
- Developed backend services that processed booking events, including issuance and cancellation, generating downstream sales, purchase, and fulfillment transactions.
- Handled production support and incident response for business-critical services, conducting root cause analysis and implementing preventive measures to minimize recurrence.

Kartuku - Junior Software Engineer | Feb 2015 - Sep 2016

Indonesian fintech and payment technology company specializing in electronic payment solutions, card payment processing, and merchant services.

- Implemented backend features to support promotional campaigns by enhancing payment data processing and transaction handling.
- Designed and developed an internal inventory management system to track and manage Point-of-Sale (POS) EDC devices, improving asset visibility and operational efficiency.
- Modernized an order management platform by separating backend services from the frontend application to improve maintainability and enable independent development.

Altrovis - Software Development Intern | Jun 2014 – Aug 2014

Indonesian IT and software development company delivering technology solutions and services for business clients.

- Developed a centralized regional management system to manage reference data used across multiple BKKBN applications.

EDUCATION

Bachelor of Computer Science - Universitas Indonesia | 2011 - 2015

GPA 3.29/4.00
